8.2 Exposure controls

Protective equipment

Appropriate engineering:

Provide adequate ventilation. Avoid inhalation

of vapours. Observe any controls occupational exposure limits for the product or ingredients.

Eye/face protection:

The following protection should be worn: Chemical splash goggles.

Hand protection:

Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. It is recommended that gloves are made of the following material: Nitrile rubber. It should be noted that liquid may penetrate the gloves. Frequent changes are recommended

Other skin and body:

Wear appropriate clothing to prevent any possibility of liquid contact and protection repeated or prolonged vapour contact. Wear apron or protective clothing in case of contact.

Hygiene measures:

Use engineering controls to reduce air contamination to permissible exposure level. Provide eyewash station. Wash contaminated clothing before reuse. Wash hands after handling. Eating, smoking and water fountains prohibited in immediate work area.

Respiratory protection:

In confined or poorly-ventilated spaces, a supplied-air respirator must be worn. Wear a respirator fitted with the following cartridge: Gas filter, type AX.

Environmental exposure controls:

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
